Education

K L University

May 2024

Bachelor of Technology in Computer Science (GPA: 9.19 / 10.00)

Vijayawada, Andhra Pradesh

- **Relevant Course work:** Data Structures and Algorithms (C/C++), AI for Data Science, EPAM Cloud DevOps Training, Cross Platform Application Development (Flutter & Kotlin), Continuous Delivery & DevOps, Data Engineering, Object Oriented Programming in Java, Database Management

Experience

Tata Consultancy Services Limited

JUNE 2024 – Present

Development Analyst

Kolkata, West Bengal

Objective : Supported team in maintaining and fine-tuning TCS Bancs software, leveraging advanced Java skills to efficiently investigate, diagnose, and resolve system faults.

- Collaborated in cross-functional teams to investigate and resolve complex software faults, leveraging strong Java proficiency to analyze root causes and implement robust solutions.
- Actively contributed to the management and administration of the software environment, utilizing in-depth Java knowledge to proactively identify, diagnose, and mitigate potential issues impacting user experience.
- Utilized advanced full-stack development techniques, with a particular emphasis on Java frameworks, to enhance user experience and optimize application performance across diverse platforms.
- Engineered and optimized core components of the application using Java and SQL, delivering efficient, scalable, and reliable backend services to ensure seamless and effective user operations.

Safertek Software LLC

NOV 2023 – March 2024

DevOps Engineering Intern

Hyderabad, Telangana

Objective : Streamline development and deployment processes through innovative DevOps practices, leveraging cloud technologies and automation to enhance operational efficiency and deliver robust, scalable software solutions.

- Designed and implemented cloud infrastructure automation using AWS services, including:
 - Configuring and managing EC2 instances for scalable application deployment.
 - Setting up AWS CloudFormation templates for infrastructure-as-code.
 - Implementing AWS Lambda functions for serverless computing solutions.
- Developed automation scripts using Shell for systematic project development and testing.
- Researched and proposed multi-cloud network architectures for microservice deployments.
- Utilized AWS CloudWatch for monitoring and logging application performance.
- Implemented CI/CD pipelines leveraging AWS CodePipeline and CodeBuild to streamline deployment processes.

Samsung R&D Institute India

Sept 2022 – Mar 2023

Research Intern

Remote (Bangalore, India)

Objective : Build an Machine learning model for predictive maintenance of IoT Devices based on noise produced.

- Designed and conducted experiments to compare various machine learning algorithms for predictive maintenance, ultimately selecting the most effective one to improve efficiency by 30%, and implemented Federated Machine Learning frameworks like Flower using gRPC for secure data transfer.
- Implemented Federated Machine Learning frameworks with secure data transfer protocols.

Projects

Federated Learning for Predicting Errors in IoT | *Machine Learning, AWS Cloud, Flower Framework*

Objective : Built a Machine learning model using Flower framework for decentralised model training.

- Developed a decentralized machine learning model using Flower framework for secure, distributed training.
- Implemented advanced data pre-processing techniques and compared multiple machine learning algorithms.
- Optimized predictive maintenance model, improving efficiency by 30%.
- Utilized AWS infrastructure for model deployment and scalability.
- Demonstrated expertise in machine learning, cloud computing, and advanced data science techniques.

KL Connect Application | *Flutter (Frontend), Node.js, SQL Database, REST API, AWS Cognito, Web Sockets*

Objective : Build an application for easy and transparent communication between the university and parents.

- Developed a comprehensive cross-platform communication application for university-parent interactions.
- Implemented robust backend API services using Node.js with SQL database integration.
- Designed secure user authentication system leveraging AWS Cognito.
- Created RESTful API endpoints for efficient real-time data communication.
- Utilized Web Sockets for instantaneous messaging and updates.
- Developed scalable application architecture with modular backend services.
- Ensured seamless data flow between frontend, backend, and authentication services.

Library Management System | *Java, Spring, Spring Boot, PostgreSQL and AWS Services.*

Objective : Developed an efficient and user-friendly library management platform utilizing Java and PostgreSQL to streamline operations and enhance resource accessibility.

- Built a comprehensive library management platform with advanced features.
- Implemented automated notification system using Spring Mail for book updates and fine notifications.
- Integrated secure payment gateway for fine management.
- Developed robust backend using Spring Boot with PostgreSQL database.
- Created a scalable and maintainable web application with multiple service integrations.

Technical Skills

Languages: Python, JavaScript, C++, Java, Kotlin, Dart, SQL

Technologies: Flutter, Node Js, Django, MongoDB, MySQL, Docker, Kubernetes, Jenkins, Version Control, RedHat Enterprise Linux.

Concepts: Data Structures & Algorithms, AWS Infrastructure Management, GitHub Actions, Database Normalization, Agile Development, Scrum, Cloud Computing, Shell Scripting, Containerization, Linux File System Management, Requirement Engineering, Monitoring & Triggering, ML Model Deployment, Application Analysis, Performance Monitoring.

Certifications

- AWS Certified DevOps Engineer Professional
- AWS Certified Developer Associate.
- EPAM Trained Cloud & DevOps Associate
- RedHat Certified Enterprise Application Developer
- Aviatrix Certified Multi-Cloud Networking Associate

Social Engagements

Google Cloud & Flutter Lead: at Google Developer Student Clubs, K L University

Peer Mentor: at K L University, An initiative by CSE Dept to support students to enhance self-learning skills.
